

SISTEMI DI GRIGLIATURA SCREENING EQUIPMENT

APPLICATION

Municipal water and wastewater screening
Civil sump screening
Industrial water and wastewater screening

COARSE SCREENING EQUIPMENT INSTALLED IN CHANNELS

Openings 10-50mm.
Channels width 500-2000 mm.
Channels depth 1500-5000 mm.

Models

- EM32A** - fully mechanical rake movement with chains above water level
- EM32H** - mechanical/hydraulic rake movement with chains above water level
- EM32C** - fully mechanical rake movement with submerged chains
- EM32OL** - fully hydraulic rake movement
- EM32D** - fully mechanical rake movement with lifting ropes

FINE SCREENING EQUIPMENT INSTALLED IN CHANNELS

Openings 3 & 6 mm.
Channels width 300-2000 mm.
Channels depth 1500-5000 mm.

Models

- EM31G** - Continuous belt and self cleaning plastic teeth
- EM31C** - Inclined fixed basket cleaning screw and compactor

FINE SCREENING EQUIPMENT INSTALLED OUT OF CHANNEL

Openings: 0.25 – 3 mm.

Models

- EM79** - Rotostrainer
- EM100G** - Ultrascreen belt filtering

ACCESSORIES

- EM49** - Screw conveyors for screened material
- EM62** - Belt conveyor for screened material
- EM56** - Screw compactor for screened material
- EM86** - Hydraulic compactor for screened material
