

SKID E SISTEMI DI DOSAGGIO

DOSING UNITS AND SKIDS

APPLICATION

Municipal water and wastewater dosage
Sludge thickening and dewatering
Industrial water and wastewater dosage
Oil and gas
Models
Polymer preparation and dosing skid – sludge thickening and dewatering flocculation
Coagulant and flocculant preparation and dosing skid – for settling improvement
Demulsifier preparation and dosing skid – for oil and water separation
Acid and caustic soda storage and dosing skid – PH setting

COMPONENTS AND OPTIONS

Mono pump
Piston pump
Membrane pump
Pulsation dumper
Calibration pot
Pressure control valve
Safety valve
Preparation mixer
Level gauge, level meter and level transmitter
Pressure gauge, pressure meter and pressure transmitter
Flow meter
Temperature meter and transmitter
PH meter and transmitter
Electrical or steam heater for tank
Electrical tracing for pipes
Insulation for pipes and tank
Explosion proof (ATEX)
Api standards
